About the investment report

The attached investment report includes only those bank account details, assets, and liabilities summarized in the aforementioned portfolio(s) and listed in detail under 'Scope of analysis.' In particular, the following may not be listed, or not fully listed, within the scope of a portfolio: Building loans and mortgage loans, consumer credits, bills of exchange and acceptances, documentary credits, fiduciary credits, guarantees and similar instruments, investment plans, pending transactions and non-securitized derivatives. Assets quoted in retrospectively generated investment reports can differ from an investment report drawn up at any given cutoff date.

Conversion rates as of 2.7.2013

USD 1 = CHF 0.947700

CHF 1 = USD 1.055156

Valuation and prices

Valuations contained in this report do not constitute an offer to buy or sell investment products at the indicated valuation. In such cases this report may refer to (internal) estimated valuations instead of official net asset values. Unless stated to the contrary, all figures are unaudited. Figure 1 illustrates the evolution of a 2D cellular automaton over eight time steps. The grid is 10x10. The initial state (t=0) has a single black cell at (5,5). At each subsequent time step, the black cells expand to form a square of side length $2t+1$ centered at (5,5). At t=5, the square reaches the boundary of the grid. From t=6 onwards, the pattern evolves to form a square with a central hole, where the hole's side length increases by 2 units at each time step.
